

I am wanting to say this is a good thing that XM Radio is doing. The Traffic and weather do to sometimes you can pick up the station that is in the states that provide you with up to date info such as this. I believe if you take this away then you are taking away the very foundation of free Entrepreneurship that this country is base on. If you do take it away then you must take it away from the NAB also, since they them self do not do a good job of getting a the up to date min. on this. I hope you take this to hart in reading. Like I said before when you go to a sate how do you know what station to leastin to. Also with XM radio you can plan your trip before you get there. I like that idea.Thank you
